Why this list

Every shipment crossing into the United States generates a bill of lading. Logistic Intel ingests those filings, normalizes the consignee, and tracks volume over the last twelve months. The 100 companies below are the busiest U.S. import consignees in our dataset, sorted by total shipment count. The list is current through May 2026.

Volume metric: shipment count of customs records (bills of lading) attributed to the consignee. HS codes, per-shipment detail, decision-maker contacts, and live lane activity sit inside the Logistic Intel app.

The list

Rank	Company	Location	Shipments
1	Ikea Distribution Services	Westampton, New Jersey	8,689

Logistic Intel pairs every shipper above with decision-maker contacts, live lane activity, HS-code mix, and per-shipment detail, refreshed weekly from customs filings. Start a free trial and pull a target list for your lane in under five minutes.

Start a free trial at logisticintel.com/signup.

About the data: shipment counts reflect bills of lading filed with US Customs and Border Protection over the trailing twelve months. Names and locations are as filed. HS codes, per-shipment detail, and decision-maker contacts are available inside the Logistic Intel app and are not included in this PDF.
